Tour Operator Alert

"Mini - Cyclone" has hit the first kilometer of the Track - Owers Corner.

On the 2nd March a mini-cyclone hit the first kilometer of the Kokoda Track at Owers Corner. No damage occurred at Owers but the track, just below the Kunai grass, sustained extensive damage from fallen trees.

The KTA is currently making a detour around the affected area which will stay in place until May. Guidance will be sought from the Works Advisory Committee meeting, 26th March, on what permanent solution is required.

We ask you all to stay on the detour as the area is clearly unsafe at present.
